

TESTIMONIAL

I worked with Marius during his 1.5 years at Digiata Technology Services.

Marius was a very committed, valuable member of our team during this period. He was key to the successful delivery of a financial reporting correspondence project at a very big financial services company.

Marius is an analytical thinker, who has the ability to solve complex technical problems when given the opportunity to do so.

On a personal level, I found Marius to be very friendly and well mannered.
